

Moon Landing LKS2 Worksheet:

What I Learnt on the Moon Landing Coding Adventure

What I learnt today

We hope you really enjoyed the Moon Landing Coding Adventure and meeting 'Professor' Trice and Al the Robot. You learnt some important computer words:

algorithm, design, test, debug

Fill in the blanks with the right word to help you remember what they mean.

An is a step by step set of instructions.

You or plan the steps to take first.

..... the steps to check they work.

When you have another go until you get what you hoped for, it's called

Draw your favourite part of the show!

'Professor' Trice and Al the Robot would love to hear about your favourite part of the show.

Draw your favourite part of the show

Write a sentence to describe what you loved about the show:

.....

Al the Robot and 'Professor' Trice would love to see your drawings, so if you would like to, please send them to al.the.robot@getwiththeprogram.org.uk

Answers:
An **algorithm** is a step by step set of instructions. You **design** or plan the steps to take first. **Test** the steps to check they work.
When you have another go until you get what you hoped for, it's called **debugging**.
